## **Solanic™ and France Protéines Services win Innovation Award at CFIA in France**

Solanic is proud to announce that a Solanic potato protein has won the first prize: the Innovation Award in the category "Food Ingredients and Additives" at the CFIA in France.

The CFIA, The Food Industry Suppliers Trade Show, in Rennes, France was held from 11-13 March 2008 and is yearly the biggest french regional trade show (1000 exhibitors) where suppliers of the food processing industry in France meet each other.

Solanic was presented in the booth of their partner France Protéines Services groupe MANE (FPS Groupe MANE). FPS groupe MANE entered for the Innovation Award with the Solanic product **Promish 204 P™**.

**Promish 204 P™** is a product which can be used in the meat and fish processing industry where caseinates can be replaced in sausages, pâté and other food preparations.

Solanic produces and markets **new high performance potato protein fractions** as ingredients for consumer food and beverage products. Uniquely, no other market player has the ability to supply high quality potato proteins. Solanic has developed a complete range of functional potato protein based technologies that offer a broad range of innovative ingredient solutions and opportunities for the food and beverage industry.

Unique **functional properties** such as **solubility, foaming, gelation, emulsification** or **combinations** of these, will allow manufacturers to create new products enhancing their competitive advantage by providing new solutions to address consumer trends such as: natural, health and wellbeing, and convenience – besides operational savings. Furthermore the potato protein is non GMO and non allergenic.

**France Protéines Services** Groupe MANE markets ingredients, flavours, marinades, culinary products, functional and aromatic blends dedicated to agroalimentary industry. FPS is also the French specialist for vegetal proteins (functional, non functional, textured).

Foxhol, the Netherlands, March 2008
